the outermost region in the mask pattern is the shielding portion, and the outmost region of the third pattern is a shielding pattern, a first phase shifter of said mask enhancer structure in said first pattern is a line shaped pattern having a first line width with a predetermined width, a second phase shifter of the mask enhancer structure in the second pattern is a line-shaped pattern having a second line width with a predetermined width, and the first line width is smaller than the second line width and a pattern width of the first pattern in a short side direction is the same as a pattern width of a the second pattern in a short side.
